INTRODUCTION

Early American Coinage

The first mint established in this country was authorized by the General Court of Massachusetts in 1651 and began operation in Boston the following year. The NE, willow, oak and pine tree coins were the product of this mint. The Bermuda coinage antedates the above by over thirty years but could hardly have had any circulation in the colonies.

In 1658 the Lord Baltimore coins were planned for Maryland but never achieved any circulation as they were all short weight.

William Wood received a Royal Grant to strike copper coins for use in the colonies and his Rosa Americana pieces undoubtedly had some circulation here as well as his Hibernia halfpence which were not accepted in Ireland.

After the Revolution several of the states established their own mints, those of New Jersey and Connecticut having quite an extensive coinage of great interest to present day collectors.

The various experimental and trial pieces speak for themselves as little is known about them, except that a large proportion of them originated in England, evidently as an effort to secure contracts for the preparation of dies for a new coinage.

To the collector who acquires a really scientific interest in this series Crosby's "Early Coins of America" is the only standard work and the sixty years since the publication have added very little to the general knowledge of the subject.

Establishment of the Mint

The United States Mint was established in Philadelphia by an act of Congress dated April 6, 1792 and began operations in March of the following year.

The cents and half cents were struck in 1793, the silver dollar, half dollar and half dime in 1794 and the eagle and half eagle in 1795. In 1796 the quarter eagle, quarter dollar and dime were first coined. The eagle was the gold unit and had a standard weight of 270 grains, with a fineness of $916\frac{2}{3}$. The dollar was the silver unit and had a standard weight of 416 grains with a fineness of 892.4. The other gold and silver coins were in proportion. It was soon discovered that these units were undervalued and either being exported or sold as bullion, therefore in 1804 the coinage was stopped, only the smaller coins being continued. The law of 1834, amended in 1837, reduced the weight of the eagle to 258 grains of a fineness of 900 and this new coin was first issued in 1838. The law of 1837 reduced the weight of the silver dollar to $412\frac{1}{2}$ grains also of a fineness of 900. The law of 1834 having placed too low a valuation on silver many of the fractional coins were sold for bullion so that the law of 1853 reduced the weight of the half dollar to 192 grains making all the fractional silver coins subsidiary.

The act of 1873 made necessary an increase in the weight of the half dollar to 192.9 grains in order to conform with the authorized weight of 12.5 grams.

Private Gold Issues

The gold coins struck by private assayers and mints in the United States form one of the most interesting series in the numismatics of our country. The first of these were issued by Templeton Reid, who established a mint near the gold mines in Lumpkin County, Georgia. The next coins

were those struck by the Bechtlers, Christopher and August, from 1831 to 1842 or later. Their mint in Rutherford, N. C., struck pieces from the gold of Georgia and North Carolina to the amount of over two million dollars.

Upon the discovery of gold in California and the influx of prospectors and traders there was an immediate need for a medium of exchange other than the unwieldy bags of gold dust. Several firms struck coins in 1849 and the State Assay Office of California, with Frederick D. Kohler as State Assayer, began stamping ingots early in 1850; a few of these still exist. In the latter part of 1850 the firm of Moffat & Co. was designated as United States Assay representatives and Augustus Humbert of New York was appointed United States Assayer to place the government stamp upon the ingots produced by Moffat & Co. This business was in 1852 conducted under the name of the United States Assay Office.

The Mormon coinage grew out of the same necessity and appeared early in 1849. It did not, however, compare with the California coinages in actual intrinsic value. The firm of Clark, Gruber & Co. in Denver coined gold from the Colorado mines and produced over \$500,000 worth in 1860 and 1861. The Parsons and Conway companies were much smaller operators.

Way up in Oregon the same need for a medium of exchange produced the two pieces struck by the Oregon Exchange Co. in 1849.

Pattern Coins

The complete series of gold pattern coins has now been listed. Through access to the splendid collection of F. C. C. Boyd we are now able to illustrate and describe the pattern dollars and hope next year to do the trade dollars and half dollars. The balance of the silver, 3 cents to quarter dollars, makes a very complete guide to this series. The tabulation of trial pieces of regular gold and silver issues rounds out this section of the catalogue.

General Information

This section has been somewhat augmented and placed in the rear of the catalogue for ready reference. The paragraph on the "Condition of a Coin" has been slightly changed to give a clearer idea of gradings used.

Notes on the Various Denominations

Under the above heading we are beginning a section of the catalogue which it is hoped will be of great assistance to collectors. While the present set-up is only a start, additions will be made every year as information on various subjects is demanded. During the year such new notes as are prepared will be published in the Coin Collector's Journal.

Compilers Note

This edition of the Standard Catalogue has been produced with the help and advice of many of the most prominent dealers and collectors in the country and the editor wishes to thank all of them for their interest and assistance.

—WAYTE RAYMOND.

EARLY AMERICAN COINS

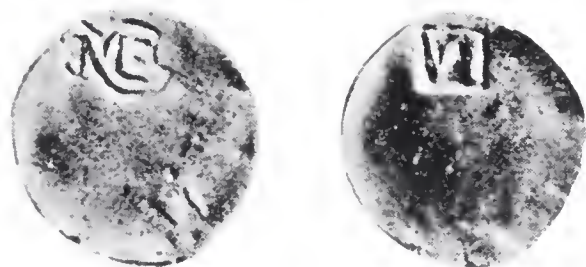

COINS OF THE COLONIES

500.00

5 Dollars 1850—Weight 111 gr..... 60.00

5 Dollars 1860—Weight 116 gr..... 125.00

The Mormons established their mint to coin the large quantities of gold dust received from California. All the coins were short weight in comparison with the regular U. S. coinage. The 20 Dollar piece was the first coin of this denomination to be struck in the country. It had an intrinsic value of only \$16 to \$18. The letters G.S.L.C.P.G. = "Great Salt Lake City Pure Gold."

SILVER THREE CENT PIECES

- 1 1849 Obverse of half dime. R Large
3. Silver. (108)

- 2 1849 Same obverse. R Large III. Silver. (108a)
Adams lists under No. 109 a muling of the two reverses. This we have seen.

- 3 1850 Liberty cap. R Value.
Adams lists under No. 111 a muling of the reverses of No. 1 and 3. This we have never seen.
- 4 1870 Standard Silver. Girlish figure of Liberty. Silver, copper, aluminum. Plain and milled edges. (1057 to 1062). Same type as Half Dime No. 1.

THE PATTERN CENTS OF 1856, 1858 AND 1859

PATTERN CENTS OF 1856, 1858, 1859

Top row—obverses. Lower row—reverses

- 1—1856 Flying eagle. Tobacco wreath as adopted in 1857. Pure nickel, copper-nickel, copper and bronze. The copper-nickel piece is the coin usually found, all the others are very rare. A variety is known with the date twice engraved.
- 2—1856 Flying eagle. Oak wreath and shield. Copper and copper-nickel. Very rare.
- 3—(1856) Eagle in plain field, no inscription or date. Nickel and copper. Very rare. Adams also mentions in copper-nickel, but I have never seen it nor have I seen the trial pieces to which he gives the numbers 214 and 215. These last, if they exist, are of such rarity that they may be rated as unobtainable.
- 4—1858 Large flying eagle. Tobacco wreath. Copper, copper-nickel and nickel. The first and last very rare.
- 5—1858 Large flying eagle. Oak wreath. Copper-nickel.
- 6—1858 Large flying eagle. Laurel wreath. Copper-nickel and copper. The last very rare.
- 7—1858 Large flying eagle. Oak wreath and shield. Copper-nickel.
- 8—1858 Small flying eagle. Tobacco wreath. Copper-nickel and copper. The last very rare.
- 9—1858 Small flying eagle. Oak wreath. Copper-nickel.
- 10—1858 Small flying eagle. Laurel wreath. Copper-nickel.
- 11—1858 Small flying eagle. Oak wreath and broad shield. Copper-nickel and copper. The last very rare.
- 12—1858 Indian head. Tobacco wreath. Copper-nickel.
- 13—1858 Indian head. Oak wreath. Copper-nickel.
- 14—1858 Indian head. Laurel wreath. Copper-nickel, copper and nickel. The last two very rare.
- 15—1858 Indian head. Oak wreath and broad shield. Copper-nickel. I have not seen the various other mulings described by Adams.
- 16—1859 Regular obverse. Reverse with oak wreath and narrow shield as adopted in 1860. Copper and copper-nickel.
- 17—1858 Regular obverse. Reverse with oak wreath and broad shield. Copper-nickel.
- 18—1859 Regular obverse. Reverse with heavy oak wreath. Copper-nickel. I have not seen the pattern described by Adams under number 314 with the tobacco wreath reverse. To complete this series of eighteen pieces in copper-nickel is a somewhat difficult task today.

ENCASED POSTAGE STAMPS

Types of Encased Stamps

ENCASED POSTAGE STAMPS

Patented by J. Gault, 1862

The great scarcity of small change during the Civil War made these stamps, encased in a metal frame, very popular. Many concerns used them as an advertising medium and placed their names on the back in embossed letters.

Values are for very fine specimens with mica intact.

Aerated Bread Co., New York

1 Cent	12.50
--------	-------

Ayer's Cathartic Pills, Lowell, Mass.

1 Cent	4.50
3 Cents	4.50
5 Cents	7.50

CONFEDERATE STATES OF AMERICA

		Unc.
1861	Half Dollar	3,000.00
1861	Half Dollar. Restrike	30.00

1861	Cent. Copper	40.00
1861	Cent. Copper-nickel	50.00

In 1861 the Confederate government took over the New Orleans mint and prepared a die for a half dollar. It is said that four specimens were struck from this die using the regular 1861 obverse. Only two pieces are known to exist. Many years after the Civil War the die of this coin was discovered and eventually bought by Mr. J. W. Scott. Mr. Scott purchased about 500 half dollars of 1861 and had the Confederate die impressed upon the reverse after it had been planed off. These coins are the pieces known as "restrikes." At the same time Mr. Scott struck about 500 pieces in white metal with the Confederate impression on one side and his advertisement on the other.

The cents were a speculative issue designed by Geo. H. Lovett, a medallist and die sinker of New York City.

United States Mints

Philadelphia. Established 1792. No mint mark.
Charlotte, N. C. Established 1838. Closed 1861. Mint mark—C. Gold only.
Dahlonega, Ga. Established 1838. Closed 1861. Mint mark—D. Gold only.
New Orleans, La. Established 1838. Closed 1909. Mint mark—O.
San Francisco, Cal. Established 1854. Mint mark—S.
Carson City, Nev. Established 1870. Closed 1893. Mint mark—CC.
Denver, Colo. Established 1906. Mint mark—D.

Mint Marks

The Philadelphia mint coins do not have any mint marks.

The only exception is that of the new composition 5 cent piece first coined in 1942.

Other marks are found as follows—

Indian head cents—under the wreath.

Lincoln cents—under the date.

Liberty head nickels—under period at left of CENTS.

Buffalo nickels—under FIVE CENTS.

Silver Three Cents—1851. O only. O opposite opening of C.

Half Dimes—under value or under wreath.

Dimes—under value or under wreath. From 1916—at left of fasces.

Twenty Cents—under eagle.

Quarter Dollars—under eagle. After 1916—at left of date. After 1932—under eagle.

Half Dollars—1838 and 1839 O. The O over date. After 1840—under eagle. 1916, 1917—On obverse over motto. After 1917—On left part of reverse near edge.

Silver Dollars—under eagle. After 1921—near eagle's wing on left part of reverse.

Trade Dollars—under eagle.

Gold Dollars—under wreath.

Quarter eagles—1838, 1839 over date. 1840 to 1907—under eagle. 1908 to 1929—near border on lower left part of reverse.

Three Dollar Pieces—under wreath.

Half eagles—1838, 1839 over date. 1840 to 1908—under eagle. 1908 to 1929—near border on lower left part of reverse.

Eagles—under eagle. After 1907—at left of value.

Double eagles—under eagle. After 1907—above date in rays.

The size of mint marks varies greatly, particularly on the early S coinage. CC mark is apt to be uneven and also varies in size. The placing of mint marks also makes additional varieties.

Mottoes On Our Coins

The motto "E Pluribus Unum" first appears on the half eagle of 1795 being featured on the scroll above eagle, as copied from the Great Seal of the United States. "In God We Trust" first appears in 1864 when the Civil War had stirred up a great religious sentiment in the country.

Signatures on Coins

The mint engraver, J. B. Longacre, placed his initials on the double eagle of 1849 and on the Three Dollar piece issued in 1854, in both instances on the truncation of the neck. The 1864 and subsequent issues of the bronze cent have L on the ribbon hanging from bonnet.

The engraver, Geo. T. Morgan, placed an M on both sides of his design for the silver dollar of 1878. This shows on the truncation of the bust and on the wreath ribbon of reverse.

Charles E. Barber engraved a B on the truncation of the Liberty head on the 1892 silver dime, quarter and half dollar. The 1907 double eagle bears the initials A S G (Augustus St. Gaudens) under the date although he did not sign the eagle.

The new 1908 coinage of quarter and half eagles shows the initials B.L.P. (Bela L. Pratt) under the Indian head. The 1921 Peace dollar has the letter F under the head (Anthony de Francisci). The 1916 half dollar bears the initials of A. A. Weinman in monogram in the lower field of the reverse, also on the obverse of the dime.

The letter M appears at the base of the right portal on the 1916 quarter dollar and is the initial of Herman MacNeil.

James E. Fraser, the designer of the buffalo nickel placed an F under the date.

The Lincoln Cent of 1909 had the initials V.D.B. (Victor D. Brenner) on the reverse but being rather conspicuous they were removed before the end of the year, but later replaced under the shoulder in 1918.

Arrows At Date

The arrows on either side of date on coins of 1853, 1854 and 1855 indicate the reduction in weight while those on the coins of 1873 and 1874 indicate the slight increase.

Drapery on Figure of Liberty

It will be noted from the various illustrations of the silver coins 1839 to 1841 that one variety has the elbow quite free while the other has a much more extensive drapery covering the entire elbow. Other differences also occur.

The Condition of a Coin

PROOF—Specially struck coins with a mirror-like surface sold to collectors at the United States Mint.

UNCIRCULATED—A new coin showing no evidence of circulation, although not necessarily brilliant.

VERY FINE—Showing only slight evidence of circulation.

FINE—Showing slight sign of wear but still an attractive piece.

VERY GOOD—Showing more or less wear but lettering clear and plain.

GOOD—Showing greater wear with higher parts of design partially gone.

FAIR—Considerably worn and type does not all show.

Proof Coins

Proof coins, in all metals, were first struck at the mint for collectors in 1858. They have a mirror-like surface unlike the regular issues. All such pieces were originally sold at a premium. The U. S. mint abolished this practice in 1915 but resumed it again in 1936.

Valuations Quoted

Condition governs the price of a coin and some pieces are rarely met with in fine state; for this reason there may be a wide variation in price between good and fine preservation. This is especially true of the early American pieces and the first types of cents and half cents. An attractive color and appearance also adds to the value of such coins.

NOTES ON THE VARIOUS DENOMINATIONS

Half Cents

The standard work on this subject is—The United States Half Cents by Ebenezer Gilbert. New York 1916.

Early dates 1793 to 1797 are becoming increasingly scarce in fine condition.

The punctuated date on 1795 is a comma-like die break after the 1.

The two varieties of 1796 rarely come in better than "good" condition.

1797 lettered edge variety is a very rare coin and when found is usually in poor condition.

1797 plain edge variety frequently comes struck on planchets cut from early cents.

1806 large 6 variety is not uncommon in uncirculated condition.

1831, 1836 Restrikes from the original dies of these years were made, also restrikes from the obverse die and reverse die of 1852.

Large and small berries in wreath. Two reverses, one with large berries and one with small were used on all the rare dates between 1840 and 1852.

Large Cents

The following reference works are usually available—

The United States Coinage of 1793-Cents and Half Cents. By S. S. Crosby. Boston 1897.

A reprint has been made of the plates.

Varieties of U. S. Cents of the year 1794. By Frossard and Hays. New York 1893.

The United States Cents of the year 1794. By S. H. Chapman. Philadelphia 1926.

United States Cents of 1796. Gilbert-Elder. New York 1909.

United States Cents of 1798 and 1799. By Geo. H. Clapp. 1931.

The United States Cents of the years 1801, 1802, 1903. By H. R. Newcomb. Detroit 1925.

United States Cents 1804 to 1814. By Geo. H. Clapp. New York 1941.

The Cents of the United States. By F. W. Doughty. New York 1890. Reprints have been made.

United States Cents 1816-1857. By F. D. Andrews. Reprints have been made of this pamphlet.

Values on early cents in very fine to uncirculated condition are very difficult to give as so much depends upon the striking, color and general appearance.

Proofs exist of nearly all dates of cents after 1820. They are very rare.

1793. Of the famous strawberry leaf variety only four specimens are known, three being in the collection of the American Numismatic Society.

1795 Jefferson head. This interesting coin is not included in the catalogue as it does not seem to be a mint product.

1804 Restrike. Struck from dies discarded and sold as junk. Not a mint product.

1823 Restrike. Struck from dies discarded by the mint. Not a mint product.

1826 over 25. The top line of the 5 barely shows under the top curve of the 6.

1839 over 36 usually comes in worn condition although a few specimens are known very fine to uncirculated. In such condition they command a very high price.

The various names given to the different types of 1839 cents date back to early collecting days.

Small Cents

The entire series of copper-nickel cents 1856 to 1864 often come in uncirculated condition with a brilliant proof-like surface. Real proofs have a sharp edge and must not be confused with such pieces.

1857-1864. The composition of these cents was 88 parts copper and 12 parts nickel.

1858 Flying eagle. In the large letter variety the base of the A in AMERICA touches the base of the M.

1858 Flying eagle. There are a good many die varieties of this coin and really more than two sizes of letters.

The bronze Indian head coins both uncirculated and proofs are usually toned in various color shades. Perfect bright red coins are very scarce and command a price well above catalogue.

The bronze cents from 1864 on are composed of 95 parts copper, 3 parts tin, 2 parts zinc.

1864 with L on ribbon for Longacre, the designer of the coin. The cut shows plainly where the L is found.

Lincoln Cents

Proofs of this series are usually very unsatisfactory except those 1936 to 1942. The coins 1909 to 1916 have a surface almost the same as ordinary uncirculated specimens but the edge is sharp. As these early dates were often in the white mint wrappers for several years they are generally badly discolored.

1909 Lincoln. First issue has the initials VDB at the lower part of reverse.

Two Cent Pieces

1864 Small motto. The letters are small and block like while the large letters are of an entirely different form.

Nickel Three Cents

The composition is 75 parts copper and 25 parts nickel.

1887 over 86. This is not a very clear over date. The outside lower curve of 6 shows at left of 7.

Nickel Five Cents

The composition of the 5 cent pieces from 1866 to 1942 is 75 parts copper and 25 parts nickel.

Not all proofs of this series are of the same brilliance. Some dates in the 80's or 90's merely have a frosty like appearance but can be identified as proofs by their sharp edge.

1939. Coins of this date have been found with the words MONTICELLO and FIVE CENTS re-engraved.

Half Dimes

The standard work on this subject is—The United States Half Dimes by D. W. Valentine. New York 1931 (American Numismatic Society).

Dimes

1796. One of the commonest varieties of this date shows a lumpy die break at left of date.

1798 over 97. There are two reverse dies combined with this obverse, one having 13 stars above eagle (the rarest) and the other 16 stars.

1798. Perfect date. Two distinct varieties of obverse, one with very small 8, the other with an average size 8.

1804. Two varieties of reverse, with either 13 or 14 stars above eagle.

1805. Two reverse varieties. With either 4 or 5 berries on olive branch in eagle's claw.

Twenty Cent Pieces

1876 CC. While the mint records show a substantial number were coined less than ten specimens are known. All of these with one exception are in mint condition.

Quarter Dollars

The standard work on this subject is—The Early Quarter Dollars of the United States, 1796-1838. By A. W. Browning. Unfortunately only 50 copies were issued.

1822. 25 over 50 variety. The engraver made an error and first cut 50 instead of 25 as value on reverse.

The same reverse was used in 1828.

The entire series of "Liberty standing" quarters is difficult to get well struck up. The head is usually rather indefinite. The two coins of the first type 1916, 1917 have the best dies.

Half Dollars

The standard work is—A Register of Half Dollar Die Varieties and Sub-Varieties. By M. L. Beistle. Shippensburg, Pa. 1929.

1794, 1795. There are several varieties of the first date and over 30 varieties of 1795. All are listed and illustrated in the Beistle work.

1807. 50 over 20 variety. The engraver made an error on first figure of value on reverse and first cut a 2 instead of a 5 in 50.

The S mint half dollars 1858 to 1865 show three distinct sizes of S.

Silver Dollars

1804. The first dollar of this date was acquired from the mint about 1845. The dies being extant several others were struck between that time and 1878. The later strikes are from the second die. Of those struck from the first die only six are known.

1836, 1838, 1839. While these have generally been accepted as part of a collection of dollars they are really the first patterns of the Gobrecht design regularly adopted in 1840. For a complete list of Gobrecht dollars see under Pattern Coins.

United States Gold Coins

Where an unusually small coinage occurs we have placed the number in brackets after the date.

Gold Proofs

This rare series represents the “de luxe” group of a United States coin collection. While the mint records are not complete it is known that only a small quantity of sets were made in any year and those of the period before 1885 are very rare.

Gold Dollars

1849. Open and close wreath. The first issues of this year have a wreath with branches spread wide. In the latter part of the year the type shows the branches drawn up to the top close to figure.

The records of the Charlotte mint show a coinage of 4 pieces in 1854. but no specimen is known. It is probable that they were dollars of 1853 delivered by the coiner in 1854.

1855 C, D, O. The 8 in date is very weak and barely shows on any of these dates. The 1855 D is the poorest struck.

The Dahlonega mint shows a coinage of 1,566 pieces in 1860 but none in 1861. It is probable that the fiscal year includes both dates.

Quarter Eagles

1834 with motto over eagle is one of the great rarities. Probably not over a dozen are known.

No mint record exists of a coinage in 1841 but 2 or 3 specimens have turned up in proof sets of that year. One or two others are known, that are evidently impaired proofs showing circulation.

1845 O. While there is no mint record of coinage a number of specimens have turned up and the coin is now usually obtainable.

A small quantity of 1848 coins were stamped CAL over eagle to indicate that they were struck from the first California gold received at the mint.

Three Dollar Pieces

The mint record of the rare dates is evidently confused as 1873 is not nearly as rare as indicated by the coinage record and at least 30 specimens are known of 1875.

1856 S. Large and small mint mark S of which the smaller is much the scarcest.

1870 S. Only two specimens of this coin were struck. One remains in the cornerstone of the San Francisco mint, the other is in a private collection.

Half Eagles

The many great rarities in this series would make a story by themselves. Only a very small number of specimens are known of such dates as 1798 small eagle, 1815, 1819, 1821, 1822, 1824, 1827, 1828, 1829, 1832.

1822. Only three specimens are known of this coin, one being in the U. S. Mint Collection.

1832. Curled 2, 12 stars is one of the rarest U. S. coins. The editor knows of only three pieces.

We have seen one or two coins dated 1916 evidently of the Philadelphia mint but are not convinced they are not S mint pieces poorly struck so that S does not show.

Eagles

The demand for the first types 1795 to 1804 has increased enormously since the last catalogue was published. We have given a valuation on the dates 1838 to 1854 only in very fine condition as uncirculated specimens are rarely met with and those of a lesser grade seldom collected.

The St. Gauden's design in 1907 has as interesting varieties as the double eagles. Of the variety with periods and rolled edge only 50 are said to have been struck while the same variety with sharp wire edge is said to have been coined to the extent of 500 pieces.

The 1933 eagle is quite a rare piece and probably not over 25 specimens exist.

Double Eagles

Twenty Dollar pieces of the 19th century are very unusual in really uncirculated condition. These coins were made to use and are usually nicked and scratched by being in bags.

The St. Gauden's type produced in 1907 brought forth a number of interesting varieties. Some of the dates are of extreme rarity notably 1921 of which only 4 or 5 specimens are known, 1931, 1932 of which there are perhaps 25 known. The 1933 coin remains an enigma. Several specimens have been sold at prices ranging from \$500. to \$1500. but it is not definitely known how many are in existence.

Domestic Coin Manufactured by Mints of the United States Since Organization to Include the Year 1935

Coinage during the early years is not susceptible of exact statement by years of actual date on coin, the registry of annual coinage being of coin delivered by the coining departments of mints within the given year, and these deliveries not having been invariably completed within the year of the date on coin as now required.

The following pages are reprinted from the pamphlet "Domestic Coin Manufactured by Mints of the United States" compiled by the office of the Director of the Mint.

For sale by the Superintendent of Documents, Washington, D. C.
Price 5 Cents.

Also available at the same source and price—

"Information relating to United States Coins and Medals." Prepared under direction of the Director of the mint.

Tabulation of the coinage 1936 to 1942 follows by years
